

IT Rollouts, Cabling, Infrastructure, Chip & PIN and so much more...

We provide a consultancy level service, understanding your business and then developing a tailored solution to suit you.

Our low cost, turn-key service can supply, configure, install and test your systems, and everything we do meets ISO 9001 standards.

We're accredited installers for Point to Point Encryption (P2PE) and for a vast range of cabling and network infrastructure, Telecoms, Electrical, Audio Visual, and more.

**Large enough to
deliver, small enough
to care**

SECURITY, CHIP & PIN

We have been installing Chip & PIN payment devices since 2003. We are fully Certified P2PE installers and can help retailers deploy their hardware quickly and cost effectively, including CCTV and physical PED Security to EPOS systems.

01

IT & INFRASTRUCTURE

Supporting infrastructure comes as part of our commitment to you. All equipment and software you need, will be configured prior to launch, taking the hassle out of the technical set-up and on-site deployment to minimise disruption to your business.

02

CONNECTING PEOPLE WITH TODAY'S TECHNOLOGY

We are your perfect technology partner, working closely with all our clients to design and maintain an IT infrastructure that is specific to their current and future business needs, to deliver the required business benefits from day one.

03

IP PROTECT & IP PROTECT LITE

Adhere to government PCI-DSS regulations with the security, technology, controls and processes required by UK and International trading standards. IP Protect and IP Protect LITE secure payment transactions direct to the acquiring bank, localising the payment activity within a secure, closed network.

WiFi & ON-DEMAND SOLUTIONS

Reach your customers with ease and generate a Return on Investment with our WiFi Marketing and On-Demand Marketing Analytics.

As many as **62% of businesses** report that customers spend more time in their facility when WiFi is easily accessible.
